

MASS-APP-013 Design Studio Series

Version 1.0 Master Plan

Engineering Preface

The Design Studio is elevated from a single application into a dedicated application series. It is the enterprise's visual cognition platform—responsible for transforming enterprise intelligence into memorable visual understanding. Every volume contains a concise two-page executive briefing followed by an approximately ten-page engineering blueprint.

Series Objectives

Version 1 prioritizes practical enterprise capability over artistic complexity. The series establishes visual storytelling, asset stewardship, enterprise communication, knowledge visualization, and AI-assisted creative workflows while preserving constitutional ownership of enterprise data.

Volume	Title	Primary Focus
013A	Design Studio Foundation	Visual cognition, architecture, enterprise asset model, constitutional boundaries
013B	Creative Workspace & Asset Management	Canvas, media library, brand kits, templates, approvals, publishing
013C	Enterprise Communications & Content	Flyers, proposals, campaigns, presentations, training, reports
013D	Enterprise Knowledge Visualization	Diagrams, timelines, SOPs, learning, maps, visual enterprise memory
013E	AI Creative Intelligence	Image/video AI, design assistance, storytelling, brand governance

013A — Design Studio Foundation

Executive Brief (≈2 pages): Mission, constitutional authority, stakeholders, scope, engineering intent.

Engineering Blueprint (≈10 pages): Visual cognition, architecture, enterprise asset model, constitutional boundaries. Includes personas, workspaces, workflows, data ownership, integrations, AI participation, security, implementation checklist, Version 1 scope, Version 2 inventory, and definition of done.

013B — Creative Workspace & Asset Management

Executive Brief (≈2 pages): Mission, constitutional authority, stakeholders, scope, engineering intent.

Engineering Blueprint (≈10 pages): Canvas, media library, brand kits, templates, approvals, publishing. Includes personas, workspaces, workflows, data ownership, integrations, AI participation, security, implementation checklist, Version 1 scope, Version 2 inventory, and definition of done.

013C — Enterprise Communications & Content

Executive Brief (≈2 pages): Mission, constitutional authority, stakeholders, scope, engineering intent.

Engineering Blueprint (≈10 pages): Flyers, proposals, campaigns, presentations, training, reports. Includes personas, workspaces, workflows, data ownership, integrations, AI participation, security, implementation checklist, Version 1 scope, Version 2 inventory, and definition of done.

013D — Enterprise Knowledge Visualization

Executive Brief (≈2 pages): Mission, constitutional authority, stakeholders, scope, engineering intent.

Engineering Blueprint (≈10 pages): Diagrams, timelines, SOPs, learning, maps, visual enterprise memory. Includes personas, workspaces, workflows, data ownership, integrations, AI participation, security, implementation checklist, Version 1 scope, Version 2 inventory, and definition of done.

013E — AI Creative Intelligence

Executive Brief (≈2 pages): Mission, constitutional authority, stakeholders, scope, engineering intent.

Engineering Blueprint (≈10 pages): Image/video AI, design assistance, storytelling, brand governance, future expansion. Includes personas, workspaces, workflows, data ownership, integrations, AI participation, security, implementation checklist, Version 1 scope, Version 2 inventory, and definition of done.

Permanent V1 Doctrine

Design Studio has no artificial page limit beyond this series plan. If additional engineering detail is required to eliminate implementation ambiguity, new companion blueprints may be added. Every significant enterprise object should be capable of telling its story visually.
