

MASS-APP-001-V02

People & Organizations Version 1.0

Executive Briefing

Defines the canonical enterprise model for people, organizations, business units, and their relationships.

Purpose

Provide a governed, unified representation of individuals and organizations across the enterprise.

Core Principles

Identity integrity, organizational consistency, relationship traceability, lifecycle governance, and constitutional stewardship.

Core Capabilities

Person profiles, organization records, hierarchies, roles, affiliations, ownership, identity resolution, and relationship governance.

Architectural Boundary

Defines people and organization entities without duplicating workflow, communications, or operational execution.

Version 1 Scope

Canonical entity definitions, organizational structures, affiliations, ownership, lifecycle states, and governance controls.

Definition of Done

People and Organizations are fully defined as governed enterprise entities.

Status
