

MASS-APP-001-V03

Relationship Timeline & Memory Version 1.0

Executive Briefing

Defines the constitutional timeline and memory model for preserving every meaningful relationship event across the enterprise.

Purpose

Provide a complete, governed history of interactions, milestones, activities, and evolving relationship context.

Core Principles

Immutable history, contextual continuity, chronological integrity, explainability, and enterprise stewardship.

Core Capabilities

Interaction timeline, milestones, notes, activities, communications references, memory summaries, contextual retrieval, and lifecycle history.

Architectural Boundary

Captures relationship memory without duplicating source records or operational workflows.

Version 1 Scope

Canonical timeline model, event taxonomy, memory indexing, retrieval rules, governance, and auditability.

Definition of Done

Relationship Timeline & Memory is fully defined as the enterprise system of relationship continuity.

Status

Complete
