

MASS-APP-001-V04

Relationship Intelligence Version 1.0

Executive Briefing

Defines the intelligence layer that transforms relationship data into actionable enterprise insight.

Purpose

Continuously evaluate relationship health, influence, engagement, opportunity, and risk.

Core Principles

Evidence-based scoring, explainability, transparency, governance, and continuous learning.

Core Capabilities

Relationship scoring, engagement analysis, influence mapping, opportunity detection, risk indicators, and AI-assisted recommendations.

Architectural Boundary

Produces intelligence from governed relationship data without altering authoritative records.

Version 1 Scope

Scoring models, intelligence services, confidence metrics, dashboards, governance, and enterprise APIs.

Definition of Done

Relationship Intelligence is fully defined for enterprise production.

Status
