Account Intelligence Version 1.0

Executive Briefing

Defines the enterprise account intelligence framework for understanding account health, value, and strategic importance.

Purpose

Provide a governed model for evaluating, monitoring, and improving account performance throughout its lifecycle.

Core Principles

Evidence-based insights, explainability, lifecycle awareness, constitutional governance, and measurable outcomes.

Core Capabilities

Account scoring, health indicators, segmentation, strategic account planning, renewal intelligence, risk detection, executive dashboards, and AI-assisted recommendations.

Architectural Boundary

Supplies intelligence and governance without replacing operational CRM transactions or financial systems.

Version 1 Scope

Canonical account model, health scoring, segmentation, intelligence services, governance controls, reporting, and integration APIs.

Definition of Done

Account Intelligence is fully defined for enterprise production deployment.
