

MASS-APP-001-V06

Relationship Insights & Recommendations Version 1.0

Executive Briefing

Defines the intelligence services that convert enterprise relationship data into actionable insights and recommendations.

Purpose

Deliver proactive guidance that strengthens relationships, reduces risk, and improves organizational outcomes.

Core Principles

Explainable intelligence, evidence-based recommendations, constitutional governance, transparency, and measurable value.

Core Capabilities

Opportunity detection, churn indicators, next-best actions, collaboration recommendations, engagement insights, and executive summaries.

Architectural Boundary

Recommendations remain advisory and never modify authoritative enterprise records or execute actions autonomously.

Version 1 Scope

Insight models, recommendation engine, confidence scoring, governance controls, dashboards, and APIs.

Definition of Done

Relationship insights and recommendation services are fully defined for enterprise production.

Status
