

MASS-APP-001-V07

Relationship Governance Version 1.0

Executive Briefing

Defines constitutional governance for enterprise relationship intelligence across the MASS platform.

Purpose

Ensure relationship data, intelligence, and collaboration remain trusted, governed, and auditable throughout their lifecycle.

Core Principles

Constitutional stewardship, privacy by design, explainability, accountability, least privilege, and continuous compliance.

Core Capabilities

Policy management, ownership, lifecycle governance, consent controls, audit history, compliance monitoring, and governance dashboards.

Architectural Boundary

Governance establishes policy and oversight without replacing authoritative relationship records or business workflows.

Version 1 Scope

Governance framework, policy lifecycle, stewardship responsibilities, compliance reporting, audit mechanisms, and enterprise APIs.

Definition of Done

Relationship Governance is fully specified for enterprise production deployment.

Status
