

MASS-APP-002-V01

Executive Cockpit Foundations

Version 1.0

Executive Briefing

The Executive Cockpit is the primary workspace of MASS HQ and the enterprise's awareness center.

Purpose

Provide a unified, role-aware starting point for every user and every workday.

Constitutional Philosophy

Promote clarity before action, awareness before analysis, and confidence before complexity.

Human-Centered Design

Interfaces remain calm, progressively disclosed, and cognitively efficient.

Enterprise Cognitive Infrastructure

Enterprise Weather, Vital Signs, Morning Briefs, Confidence, recommendations, and navigation form the awareness layer.

Core Architectural Components

Awareness Engine, Workspace Engine, Recommendation Engine, Navigation, AI Companion, Notifications, Search, and Executive Insights.

Role Within MASS HQ

Coordinates awareness while delegating execution to specialized applications.

Design Objectives

Reduce uncertainty, protect attention, and accelerate quality decisions.

Platform Consumption Map

Consumes core platform services for identity, AI, security, documents, workflow, analytics, notifications, and communications.

Constitutional Boundary Statement

Does not replace operational systems or own persistence, authentication, or messaging.

Version 1 Scope

Enterprise home workspace, role-aware dashboard, awareness widgets, personalization, and application entry points.

Definition of Done

The Cockpit foundation is fully defined for engineering implementation.
