

MASS-APP-003-V03

Resource Scheduling & Allocation Version 1.0

Executive Briefing

Defines the constitutional framework for scheduling and allocating enterprise resources across operational missions.

Purpose

Provide governed planning and optimization for personnel, equipment, facilities, and time while maintaining operational readiness.

Core Principles

Resource visibility, balanced utilization, accountability, explainability, constitutional governance, and operational efficiency.

Core Capabilities

Scheduling, allocation, capacity planning, availability management, conflict detection, optimization, utilization analytics, and executive dashboards.

Architectural Boundary

Coordinates enterprise resource planning without replacing specialized HR, ERP, fleet, or asset management systems.

Version 1 Scope

Canonical resource model, scheduling lifecycle, allocation rules, governance controls, reporting, and enterprise APIs.

Definition of Done

Resource Scheduling & Allocation is fully defined for enterprise production deployment.

Status
