

MASS-APP-003-V04

Operational Intelligence Version 1.0

Executive Briefing

Defines the intelligence layer that transforms operational data into enterprise decision support.

Purpose

Provide governed operational insight, predictive awareness, performance monitoring, and actionable recommendations.

Core Principles

Explainability, transparency, measurable confidence, constitutional governance, and continuous operational learning.

Core Capabilities

Operational analytics, KPI monitoring, predictive alerts, bottleneck detection, mission health scoring, executive dashboards, and AI-assisted recommendations.

Architectural Boundary

Supplies operational intelligence without replacing execution systems or authoritative operational records.

Version 1 Scope

Operational intelligence models, analytics services, governance controls, reporting, and enterprise APIs.

Definition of Done

Operational Intelligence is fully defined for enterprise production deployment.

Status
