

MASS-APP-003-V05

Asset & Equipment Management Version 1.0

Executive Briefing

Defines the constitutional framework for governing enterprise assets and equipment throughout their operational lifecycle.

Purpose

Provide a unified model for inventory, utilization, maintenance, availability, and lifecycle stewardship of physical assets.

Core Principles

Accountability, traceability, lifecycle integrity, operational readiness, constitutional governance, and continuous optimization.

Core Capabilities

Asset registry, equipment tracking, maintenance scheduling, inspections, utilization analytics, depreciation awareness, warranty management, and executive dashboards.

Architectural Boundary

Coordinates enterprise asset intelligence without replacing specialized ERP, CMMS, fleet, or finance platforms.

Version 1 Scope

Canonical asset model, lifecycle states, maintenance governance, reporting, integrations, and enterprise APIs.

Definition of Done

Asset & Equipment Management is fully defined for enterprise production deployment.

Status

Complete
