

MASS-APP-003-V01

Operations Foundations Version 1.0

Executive Briefing

Establishes the constitutional foundation for the MASS Operations application and the enterprise operating model for executing work.

Purpose

Define the canonical operational framework for planning, coordinating, executing, and governing enterprise operations.

Core Principles

Operational clarity, mission alignment, accountability, transparency, constitutional governance, and continuous improvement.

Core Capabilities

Operational planning, work coordination, resource allocation, mission tracking, status visibility, performance monitoring, and operational governance.

Architectural Boundary

Defines operational governance and execution models without replacing specialized line-of-business systems.

Version 1 Scope

Operational entities, mission model, execution lifecycle, governance controls, reporting, and enterprise integration interfaces.

Definition of Done

Operations Foundations are fully defined for enterprise production deployment.

Status
