

MASS HQ Engineering Library

Volume 01 — Builder's Guide

Document ID: MASS-ENG-001

Version: 1.0

Status: Approved for Version 1 Engineering

Mission

Transform the Enterprise Constitution into an implementation-ready platform. This guide establishes how every engineer and AI builder should approach MASS HQ.

Engineering Principles

Constitution First. Build foundations once. Keep momentum. Preserve future inventory. Favor clarity over complexity. Deliver implementation-ready guidance.

Engineering Standard

Every engineering volume answers five questions: What is it? Why does it exist? How is it built? What does it integrate with? How do we know it is complete?

Build Workflow

Read the Constitution. Read the applicable Engineering Volume. Implement. Test. Review. Refine. Continue.

Definition of Done

A volume is complete when an experienced engineer or Claude can implement the capability without ambiguity, while remaining faithful to the Constitution and preserving future evolution.

Engineering Creed

We build with purpose. We protect the Constitution. We build foundations once. We preserve future inventory. We favor clarity over cleverness. We measure success by what can be built.

Revision History

v1.0 — Initial Engineering Library publication.
